Richard H. Karney, P.E., Manager  
ENERGY STAR Program  
Building Technologies Program  
Department of Energy  
Washington, DC 20585

Re: Window criteria, Energy Star

Dear Mr. Karney,

I am the Technical Director for Pdc; we are a flat glass fabricator with facilities in Plymouth, MI and Cheswick, PA. I would like to express my company's support for the four-zone proposal that is currently being considered. We feel this is the best proposal for our marketplace, our business, customers, and the economy. Adoption of the three zone alternative would not only be disastrous to our business it would as well be removing a viable option from our customers in energy saving products.

We strongly recommend the DOE make the right choice and adopt the 4 zone criteria for the Energy Star Window program. This will save the maximum amount of energy and will have direct benefits to the market place and consumers.

Thank you for your consideration.

Sincerely,

Timothy J. Moore  
Mgr. Pdc Technical Services
